

#Mercian17 *In Libraries We Trust*

Gareth Cole

Parallel Session #6

Creating a Trusted Support Network: The Mercian RDM support group

Gareth Cole is the Research Data Manager at Loughborough University and has been in post since March 2015. His role includes: managing the University's Research Data Repository; assisting researchers with data management plans; leading training on research data management (RDM); advising researchers on RDM matters; advising on open research. He works closely with academic colleagues as well as Professional Services colleagues in the Library, IT, and Research Office. Gareth has helped to set up the MERCIAN RDM Support Group.

Previous to working at Loughborough he was the Data Curation Officer at the University of Exeter where he worked on the Jisc funded Open Exeter project (2011-13), helping to establish an institution-wide research data infrastructure.

Before working in research data management Gareth completed a PhD in Maritime History at the University of Exeter. He has subsequently published a monograph, in addition to a number of other publications, based on this research and continues his research when time allows. As such, he has experience of working in both a research and a research support environment.

Gareth is on Twitter ([@DrGarethCole](#)) and [ORCID](#).
